SAT PREP WORKSHOP

JULY 9 – AUGUST 23, 2018

MONDAY THROUGH THURSDAY 9 TO 11

The main focus of the 56 hour workshop will be on the 42 skills for Math. There will also be a portion on the 28 skills for Reading and Writing in addition to test taking strategies.

SAT question practice / Math. SAT questions will be used and practiced in the class. We walk through solving tons of practice math problems covering all of the skills students need for both SAT Math sections. The examples are split by difficulty level on the SAT. The teacher will also assist students in knowing how to use their calculator effectively on the calculator portion of the test. The teacher will assign additional practices after the class.

SAT critical reading /writing training/question practice/analysis. We will focus on key documents from history, science, culture, politics or religion, —exactly the kind of documents which now make up majority of the Reading section of the redesigned SAT. The critical reading and thinking skills that will be targeted are important and necessary foundations that can greatly improve SAT achievements. The teacher will summarize and generalize the typical question pattern, help students understand the question purposes and background information in order to teach test taking strategies. An essay homework will be assigned every week. The teacher will grade every submitted essay and give review comments. During the next class, a sample student essay will be used anonymously to analyze as a group. Based on time and student achievement, the teacher will administer at least one full-length official practice test in class.

The Teacher  Ms. Burdick holds a Master's Degree and is NYS certified in Mathematics and Special Education. With over 20 years of teaching, she has 10 years of experience teaching Algebra 2 and International Baccalaureate Math Studies. The teacher is currently a Special Education Teacher at Seton Catholic Central and an adjunct for both SUNYBroome and Empire State College.
