

## St. James School Chromebook Acceptable Use Contract

St. James School is committed to supporting children's learning during time away from school during unusual situations. Due to this commitment, we are allowing the use of school chromebooks at home during those situations.

Care must be taken by the entire family to ensure that students are using the devices borrowed for educational purposes only. The student must not add or remove any apps, visit any websites that are not assigned by the teacher, or use the device to send or receive messages/emails/videos other than to their teacher. The chromebook and student Google account is school property and should be treated as such.

### Family Agreement and Signatures

I understand that it is not possible for St. James School to restrict access to all unauthorized materials while the device is in my child's possession, and I monitor my child's usage to ensure they are using the device for educational purposes only. Any loss or replacement of a broken device will be the responsibility of the parents.
